

TS SDP4 (Cloud DevOps)

ID NO: 190030677

Name: K. Sravani

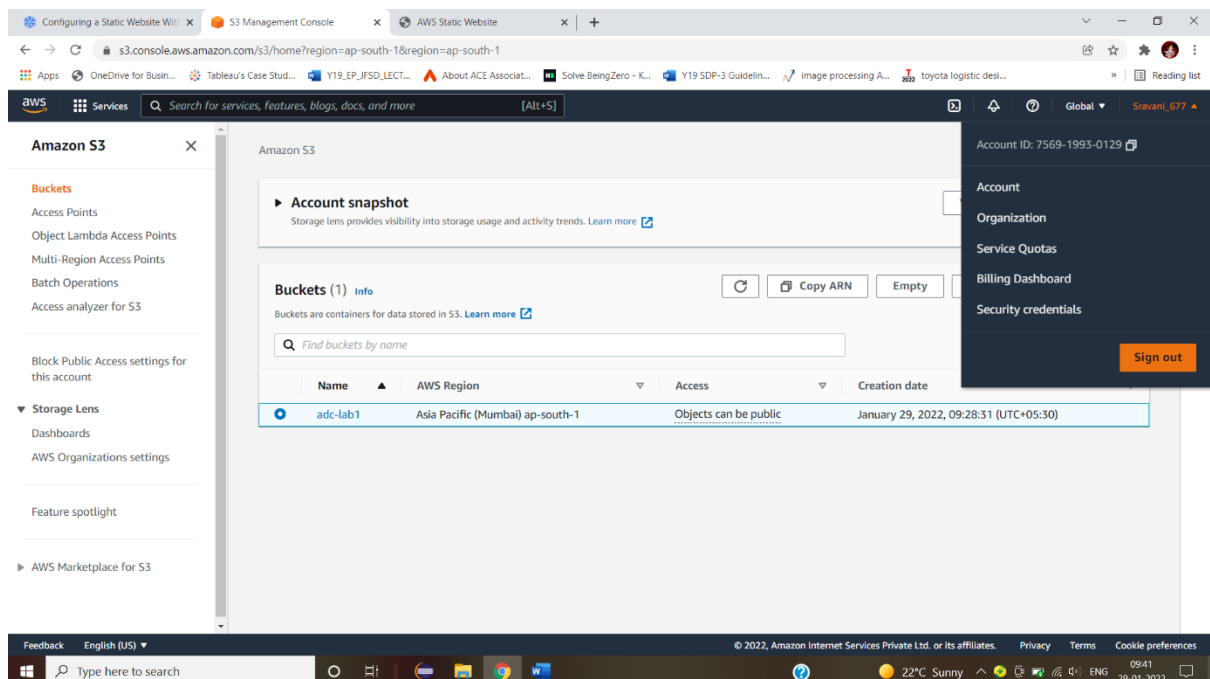

Skilling-4

Create an AWS S3 bucket and add the objects in that. Make it as public access and copy the http link for accessing your objects through browser.

The created S3 bucket now can be used to host the static website, so use that S3 bucket to host some static website with HTML, CSS and JS.

Steps:

1. In the AWS Management Console search bar, enter **S3**, and click the **S3** result under **Services**:
2. To start creating a new Amazon S3 bucket, in the top-right, click **Create bucket**:
3. In the **Block Public Access** section, un-check the **Block all public access** check-box:
4. To acknowledge that you want to make this bucket publicly accessible, check **I acknowledge that the current settings might result in this bucket and the objects within becoming public**:

Objects (4)

Objects are the fundamental entities stored in Amazon S3. You can use [Amazon S3 inventory](#) to get a list of all objects in your bucket. For others to access your objects, you'll need to explicitly grant the
